

Patricia DeNune, Huntsville Engineering and Support Center, (256)895-1678

1. I noticed that there are no names listed for the "cover sheet, index sheet, and fire code analysis." *Clarification: This question applied to the Sheet Type Codes for the Sheet File Naming Convention (Tri-Service Optional) in Appendix A.*

Response: The fire code analysis can be found under the Architectural discipline as Life Safety Plan (LS). Cover Sheet will be added to the General discipline as "CS" and Index Sheet will be added to each discipline as "IS." Note: Several of the Sheet Type Codes will be reevaluated to determine if they are actually Sheet Files (e.g., Border Sheet).
