

September Progress Report

The following activity occurred during the month of September 2001.

1. Completed processing the Orchard Training datasets to obtain individual attributes for the features.
2. Completed the Migration Procedures with focus on Migrating data to NGB SDS Oracle/SDE Geodatabase and Migrating SDE/Oracle Geodatabase to Personal Geodatabase.
3. Migrated the Orchard Training data into a SDS Personal Geodatabase and a SDE Multi-user Geodatabase using the Automated Batch Processing, testing the Migration Procedures.
4. Continued development of the UML Model in Rational Rose.
5. Taught two SDS NGB Geodatabase Workshops at the ITAM Conference on August 27-29, 2001. Distributed brochures, SDS 2.0, and migration procedures. Sent all 39 students (Attachment A Roster) soft copies of slides and procedures.
6. Posted August 2001 progress report and features/attributes draft correlation matrix to the Web Discussion Forum for NGB-EP, which can be accessed at tsc.wes.army.mil Discussion Forums – NGB-EP.
7. Created web pages for additional knowledge sharing, including questionnaires. Published pictures of NGB Project personnel with biographies.
8. Obtained AXL scripts from Headquarters as a template for additional web pages.
9. Began migrating DE Armories data into a personal Geodatabase to use for demo purposes. Using Arc 3D Analyst with available contours to simulate flooding and natural disasters.
